

DACIA HJD REAR PARKING SENSORS

8201 70 15 57

After-sales rear parking sensors dedicated to Dacia HJD platform, built at OEM quality standards

Safely

Helps you maneuver the vehicle in extremely narrow and most difficult places.

Safeguard

Protect pedestrians that walk in behind your car and avoid obstacles under rear screen level.

Comfort

Avoid minor accidents involving police, insurance, service and lost time.

Value

Keep intact the value of the car and avoid unnecessary expenses with repairs below the minimum level of compensation.

DACIA HJD REAR PARKING SENSORS

8201 70 15 57

FUNCTIONS

Sound alerts

Avoid false alarms

Unobtrusive fitting

Sensors control

BENEFITS

Acoustic warning in 3 steps depending on the distance to the obstacle

When the car is equipped with a towing rack or bulb, the system eliminates false alarms

Designed specifically for Dacia Duster at OEM standards, allows painting to match car color without affecting its functionality

Rear sensors are activated when gearbox is in reverse

TECHNICAL DATA

No. of cells	4
Detection range	0-2 m
Working frequency range	50 kHz +/-2Hz
Horizontal angle	120 ⁰
Vertical angle	60 ⁰
Voltage range	9V ÷ 16V
Power Consumption	≤200mA
Operation Temperature	-40°C ÷ +85°C
Installation time	2.2 h
